Power 20
20,000mAh Universal Portable Charger
User Manual

Charging The Portable Charger
- Simply plug the portable charger into a USB-A wall charger using a Lightning or USB-C cable
- The battery status and indicator LEDs will blink indicating the portable charger is charging
- When fully charged, all LED indicators will be illuminated
- Fully charging your portable charger from 0% battery level should take 10-13 hours

Charging Your Device
- Your portable charger is compatible with most phones and tablets, and can be charged using your own cable. Simply plug your device cable into the USB-A output to begin charging.
- When charging, the white LED’s will remain lit until the portable charger runs out.

Important Safety Instructions
WARNING - When using this product, basic precautions should always be followed, including the following:
- Read all manufacturers instructions before using this product.
- To reduce the risk of injury, close supervision is necessary when the product is used near children.
- Do not put fingers or hands into the product.
- To reduce the risk of injury, close supervision is necessary when the product is used near children.
- Do not expose the portable charger to moisture, rain, or snow.
- Use of a power supply or charger not recommended or sold by power supply manufacturer may result in unpredictable behavior resulting in fire, explosion, or risk of injury.
- Do not disassemble the portable charger. Take it to a qualified service person when service or repairs are required. Incorrect reassembly may result in a risk of fire or injury to persons.
- Do not expose the portable charger to fire or excessive temperature. Exposure to fire or temperature above 122°F may cause explosion. The portable charger’s working temperature is ≤104°F.
- Have service performed by a qualified repair person using only identical replacement parts. This will ensure that the safety of the product is maintained.
- Switch off the portable charger when not in use.

Technical Specifications
Model: PWB1058
